Misconceptions

**“If I am a registered organ donor,
the hospital staff won't work as hard to save my life.”**

FACT: When you go to the hospital for treatment, doctors focus on saving your life — not somebody else's.

Misconceptions

**“An open-casket funeral isn't an option for people
who have donated organs or tissue.”**

FACT: Organ and tissue donation doesn't interfere with having an open-casket funeral.

Misconceptions

“I’m too old and not in the best of health. Nobody would want my organs or tissue.”

FACT: There's no defined cutoff age for donating organs.

Misconceptions

“Rich and famous people go to the top of the list when they need a donor organ.”

FACT: Organs are allocated based on the recipient's blood type, body size, medical urgency, length of time on the waiting list and proximity to transplant center, not their social or financial status.

Misconceptions

“Organ donation is against my religion.”

FACT: Most Religions support organ and tissue donation as one of the highest expressions of compassion & generosity.

Charter for Compassion

The principle of compassion lies at the heart of all religious, ethical and spiritual traditions, calling us always to treat all others as we wish to be treated ourselves.

Compassion impels us to work tirelessly to alleviate the suffering of our fellow creatures, to dethrone ourselves from the center of our world and put another there and to honor the inviolable sanctity of every single human being, treating everybody, without exception, with absolute justice, equity and respect.
